

HCSA 新能源线束卡钉检测台

HCSA New Energy Wire Harness Clip Testing Table

产品介绍 Introduction

HCSA 型新能源线束卡钉检测台是一种用于线束行业集卡钉卡扣的安装和检测一体化的安装检测设备，针对新能源汽车线束不规则卡钉分布的结构而研发的检测设备，它解决了新能源线束卡钉安装和检测分别进行，效率低下的问题，使效率得到极大的提升，同时也解决了漏装、错装等问题，有效的保证了产品质量。HCSA New Energy Wire Harness Clip Testing Table is used for installing and detecting clamps and clips in wire harness industry. It developed for the irregular clip distribution structure of the new energy vehicle wire harness. It solves the problem of inefficient installation and detection of the new energy wire harness clips separately. It greatly improves the efficiency, and also solves the problems of missing and wrong installing, effectively ensuring product quality.

特性 Features

- 工控机控制性能稳定；The control performance of IPC is stable;
- 可以自动学习每个卡钉点位，并且自定义卡钉名称；Automatically learn each clip point, and customize its name;
- 扫描线束二维码，直接进入检测程序；Scan the two-dimensional code of the wire harness and enter the detection procedure directly;
- 铝合金框架，外型简约美观；Aluminum alloy frame, simple and beautiful appearance;
- 发光二极管智能引导，操作更方便；LED intelligent guidance, more convenient operation;
- 声音提醒、图形化显示，显示故障清楚直观；Sound reminder, graphical display, display fault clear and intuitive;
- 3D 设计，模拟装车；3D design, simulated loading;
- 尺寸精准控制；Precise size control;
- 完全自主研发设计，交期、售后有效保障。Fully independent research and development design, effective guarantee of delivery and after-sales service.

技术参数 Specifications

型号 Model	HCSA	功率 Power	350W
外形尺寸 Dimension	Customization	台架结构 Tabel structure	平面式、翻转式 Flat type, flip type

气源 Air supply	5-6Bar	采 集 速 度 Speed collecting	1024 points/second
电源 Power supply	AC220V	Detection range	1024 (open-ended)
